

# HERMES

DDR5158 x SW163/55

- Proven crisps quality
- Suitable to grow in warm climates
- High yield potential

## VARIETY DESCRIPTION

### Characteristics

Skin colour	Yellow
Flesh colour	Yellow
Fries quality	Excellent / 2.0
Tuber shape	Round Oval
Tubers per plant	8 - 10
Maturity	Maincrop
Dormancy	Long
Berries	None
Cooking type	C
Average tuber length	87
Washability	- / -
Underwater weight	415 - 435
Dry matter %	22 - 23 %

### Sensitivity

Bruising	Quite sensitive
Mechanical damage	Quite sensitive
Growth cracks	Slightly sensitive
Secondary growth	Slightly sensitive
Sencor (Metribuzin)	Slightly sensitive
Drought	Slightly sensitive
Hollow hearts	Slightly sensitive

### Resistances

Y virus	Slightly susceptible
Yntn virus	Slightly susceptible
Spraing	Slightly susceptible
Tuber blight	Slightly susceptible
Foliage blight	Quite susceptible
Fusarium	Slightly susceptible
Common scab	Slightly susceptible
Wart disease F1	Not susceptible / 10
Wart disease F2	- / -
Wart disease F6	- / -
Wart disease F18	- / -
PCN Ro1	Susceptible / 2
PCN Ro2/3	- / -
PCN Pa2	- / -
PCN Pa3	- / -
Silver scurf	- / -
Early blight	- / -
Leaf roll	Quite susceptible
