

# Hermes

Crisps Potato Variety · DDR 5158 × SW 163/55

## High Yield Potential

High yield, especially in warm climates

## Proven Crisps Quality

Excellent for crisps processing (Type C)

## Warm Climate Adapted

Good heat and drought resistance

## Long Storage Life

Long dormancy, suitable for long-term storage

## MORPHOLOGY

Cooking type	<b>C - Floury</b>
Maturity	<b>Maincrop</b>
Yield	<b>High</b>
Tuber size	<b>Large</b>
Tuber shape	<b>Round oval</b>
Tubers per plant	<b>8 - 10</b>
Skin colour	<b>Yellow</b>
Flesh colour	<b>Yellow</b>
Flesh after cooking	<b>No discolouration</b>
Eye depth	<b>Shallow</b>
Berries	<b>None</b>
Dormancy period	<b>Long</b>
Dry matter content	<b>23%</b>
Underwater weight	<b>435</b>
Washability	<b>- / -</b>
Fries quality	<b>Excellent</b>

## TOLERANCES & SENSITIVITIES

Drought resistance	<b>Slightly sensitive</b>
Metribuzin sensitivity	<b>Slightly sensitive</b>
Internal bruising	<b>Quite sensitive</b>
Harvest damage	<b>Quite sensitive</b>
Secondary growth	<b>Slightly sensitive</b>
Growth cracks	<b>Slightly sensitive</b>
Hollow heart	<b>Slightly sensitive</b>
Little potato disorder	<b>Moderate sensitive</b>
Foliage development	<b>Good</b>
Emergence	<b>Normal</b>

## DISEASE RESISTANCES

Foliage blight	<b>Quite susceptible</b>
Tuber blight	<b>Slightly sensitive</b>
Fusarium	<b>Slightly sensitive</b>
Common scab	<b>Slightly sensitive</b>
Powdery scab	<b>Slightly sensitive</b>
Spraing	<b>Slightly sensitive</b>
Wart disease F1	<b>Resistant</b>
Wart disease F2/F6/F18	<b>- / -</b>
PCN Ro1	<b>Susceptible</b>
PCN Ro2/3 / Pa2 / Pa3	<b>- / -</b>
PVY / PVYn	<b>Slightly susceptible</b>
PLRV (Leaf roll)	<b>Quite susceptible</b>
Yntn virus (tuber)	<b>Slightly susceptible</b>
Early blight	<b>- / -</b>

## PLANTING POPULATIONS

Seed size	Plants/ha	75 cm row
28/35 mm	55,000	24 cm
35/50 mm	45,000	30 cm
